

## 7P/12V socket (ISO 3732 - Type S)

|                              |                      |
|------------------------------|----------------------|
| Product group                | Socket               |
| Industry                     | Cars, Agriculture    |
| No. of poles                 | 7                    |
| Voltage [in V]               | 12                   |
| Standard                     | ISO 3732 - Type S    |
| Design/Version               | ball design          |
| Housing material             | reinforced composite |
| Housing color                | black                |
| Cover material               | reinforced composite |
| Cover color                  | white                |
| Contact termination          | plug-in contact      |
| Features of plug-in contacts | flat terminal        |
| Size of plug-in contacts     | 6.3 x 0.8mm          |
| Protection                   | IP 44                |

|           |        |
